Sudhan Kandel

Frontend Developer

✉ sudhankandel18@gmail.com   ☎ 9846893341   🌐 www.sudhankandel18.com.np

Enthusiastic and self-motivated web developer with a years of experience. Eager to join your company and bring my skills in languages such as JavaScript, ReactJS, and TypeScript to frontend development projects that will be received in the future. I am familiar with the Agile development process, can quickly learn new technologies and methodologies, and am currently learning MERN stack development.

Projects

- **ARTEVO - a E-Commerce Website**
  - As a React developer, I have independently designed and developed the ArtEvo e-commerce website, an electric and electronic goods supplier. Taking full ownership of the project, I utilized my skills in React to create a user-friendly interface and implemented key features. Using Strapi for the database and Stripe for payment integration, I ensured a seamless shopping experience. The site showcases functionality including product browsing, adding items to the cart, placing orders, and secure payment processing. This project demonstrates my capabilities as a React developer and my ability to create a fully functional e-commerce platform.

- **Chattu - a demo chat app**
  - As a React developer, I independently created a chat application that offers fundamental communication features. I took full responsibility for the project, leveraging my expertise in React to design an intuitive user interface and integrate key functionalities. The app supports adding and removing friends, managing group chats, handling individual conversations, and overseeing profile settings. This project illustrates my ability to develop a robust chat platform with essential user management and interaction capabilities.

- **Login Mangement App**
  - developed a login application using the MERN stack, overseeing both the frontend and backend components. Leveraging React for the user interface, I integrated it with a Node.js and Express backend, along with a MongoDB database. The application includes comprehensive features such as user registration, login, profile management, password recovery, and password reset. By implementing robust authentication, password hashing, and secure data management, this project highlights my ability to create a full-fledged login system with essential functionalities and security measures.

- **Other Projects**
  - GitHub

Skills

Soft Skills

- Excellent communication and interpersonal skills.
- Ability to work independently and collaboratively.
- Able to work effectively with minimal guidance and supervision.
- Creative thinking
- Problem-solving Research
- Graphic Designer (Instagram)

Technial Skills

- **Languages** : JavaScript
- **Web Technologies :** HTML5 ,CSS3 , JAVASCRIPT
- **Framework / Tools :** React Native, Postman, Thunderclient, Bootstrap
- **APIs and Integrations**: RESTful APIs
- **Operating System**: Windows, Linux
- **Databases**: MongoDB
- **Version Control** : Github

Education

Oxford Secondary School, NEB   *2076*

- Science

Butwal Multiple Campus ,Tribhuvan University   *2081*

- Bachelor of Science Computer Science and Information Technology
